

**STOCK STAINLESS STEELS HOLLOW BAR ,ASTM A511/ASME SA479, 304L/316L**

# Sizes Available from Stock

Nebetco Stainless, Inc. stocks a complete range of stainless hollow bar (mechanical tubing) sizes from approximately 1.25" to 10" O.D. Sizes available from stock are listed in the accompanying tables. Other sizes of hollow bar can also be supplied on order.

Whether you order from stock in full lengths or cut to your specifications, fast delivery is assured. Product is normally shipped from our warehouse to you within hours of receipt of order.

## Guaranteed Component Sizes

The indicated dimensions after machining apply to lengths of maximum 2.5 times the outer diameter. For longer lengths, dimensions must be calculated individually.

## Tolerances

Outer Diameter: +2%/-0% with a minimum of +0.039"

Inner Diameter: +0/-2% with a minimum of +0/-0.039"

## Grades

Hollow bar is supplied from stock in the most common 304, 316, 304L and 316L grades.

Other grades can be supplied on order. Please call with your inquiries.

## Ordering

When you call with your inquiry or order, please indicate, when possible, the finished machining dimensions of your components. This will help determine the most economical size we can supply so that you can reduce your machining time.
